#### **Prestashop**

Prestashop is one of the most used CMS for eCommerce. It mait's simple and powerful and during this exercises you're going to do the following tasks:

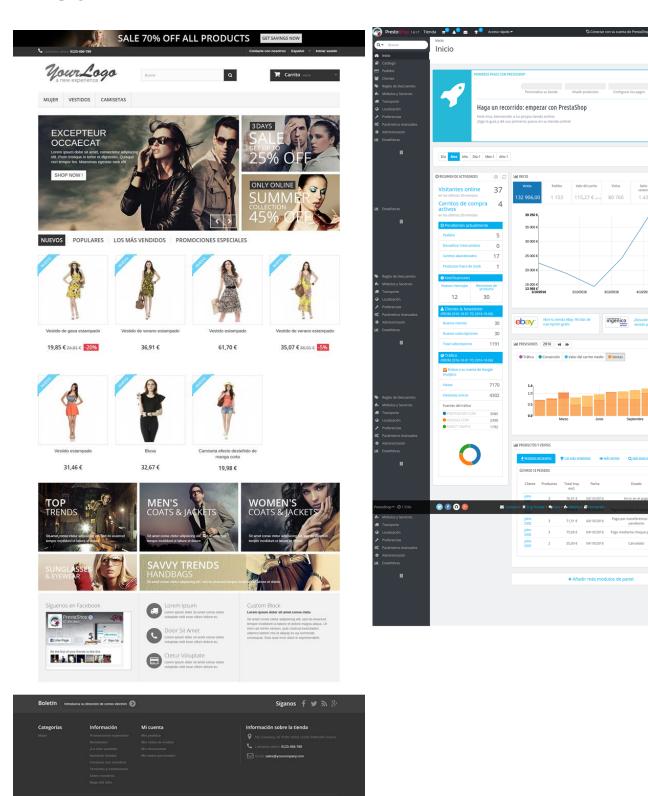

1. Install Prestashop without any data. Change the name of the shop and use (Your name's online Shop). Create a full screen snapshot (look for the right browser extension for that)

Instalación:

#### Mi página:

La captura fue realizada con la extensión full page screen capture.

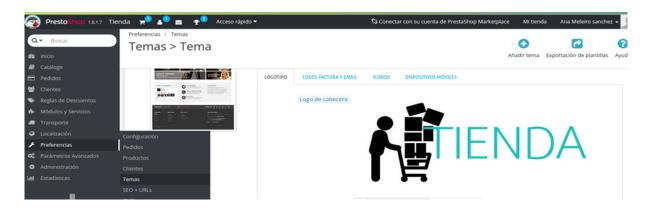

## 2. Write down the required Apache version, Php version and MySQL for your Prestashop Installation.

#### 3. Change the home page:

- Change the website logo.

En preferencias > temas

y cambiamos la imagen que viene de ejemplo por el logo que queramos.

Deactivate any modules you need in order to show only contact info and categories at the footpage.

En modulos y servicios > modulos y servicios y solo dejamos esos dos modulos.

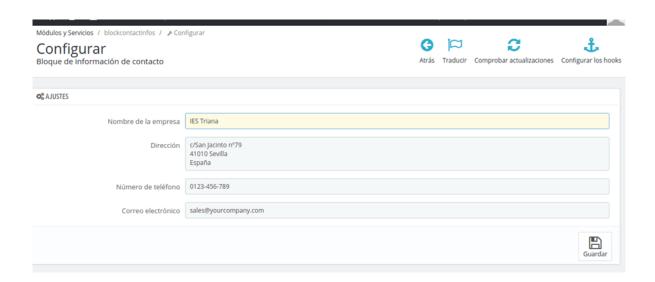

- Change the contact module and use IES Triana address as the shop address.

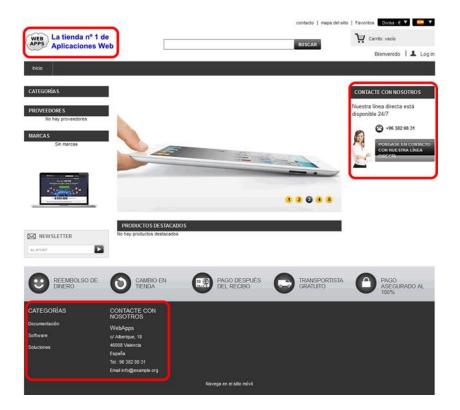

En modulos y servicios > modulos y servicios y entramos en la configuración del modulo de "Bloque de informacion del contacto".

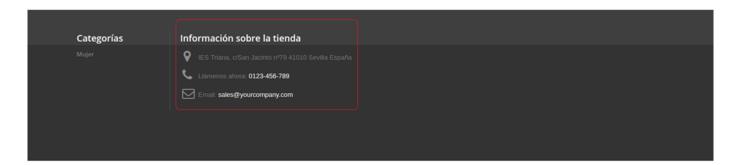

- Describe the process for all the previous changes and add a full screen snapshot similar to the following picture.

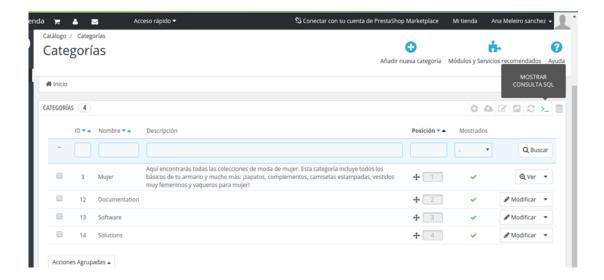

4.Create 3 categories (Dcoumentation / Software / Solutions ).Change the configuration of the horizontal menu ir oder to show those 3 categories and as a not logged user create a full screen snapshopt similar to the following picture.

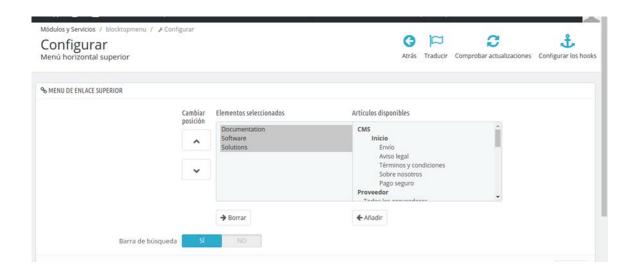

### Entramos en catálogo > categorías y añadimos las tres categorías

Después nos vamos a los módulos y agregamos a Menú horizontal superior.

#### Le damos a configuración

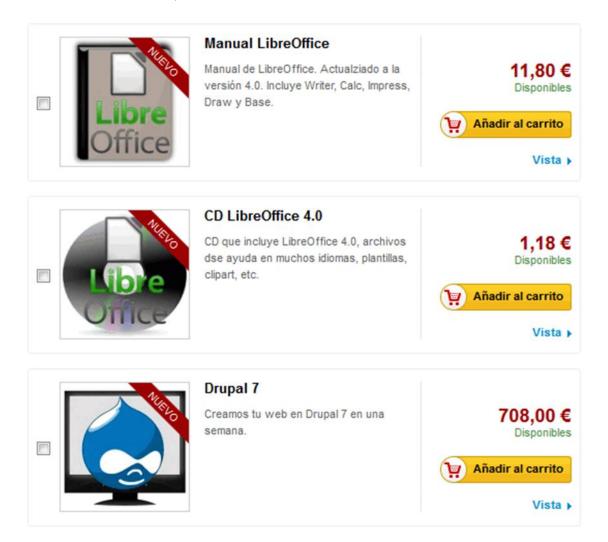

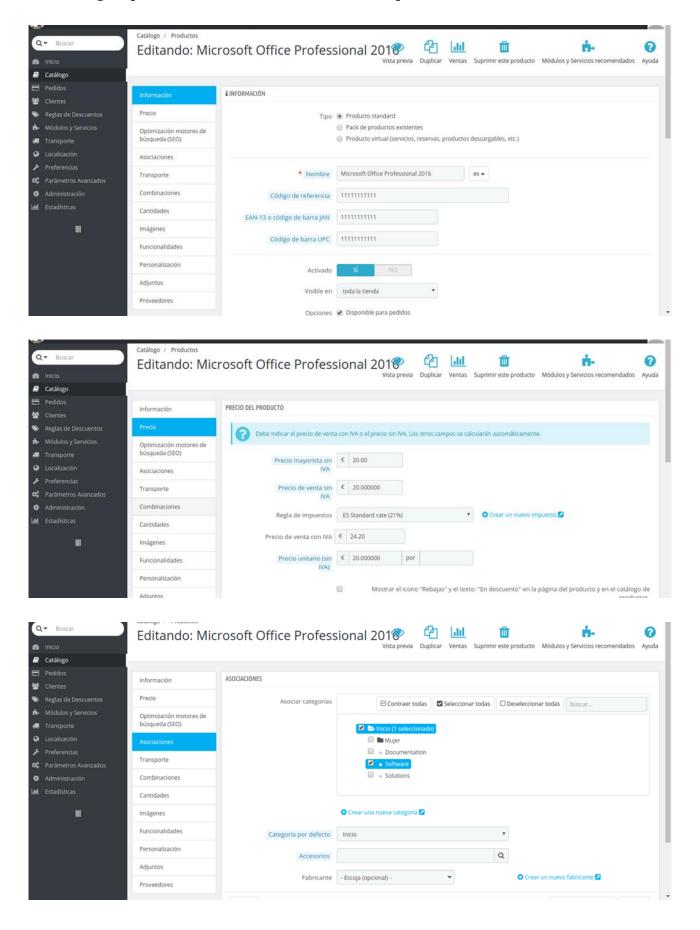

DOCUMENTATION SOFTWARE SOLUTIONS

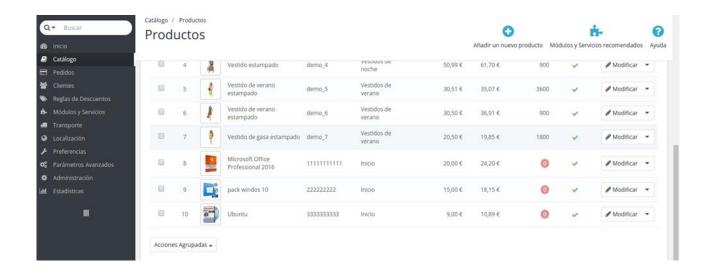

5. Add three products for each of one the new categories and as a not logged user create a full screen snapshopt similar to the following picture (New Producs or What's new section).

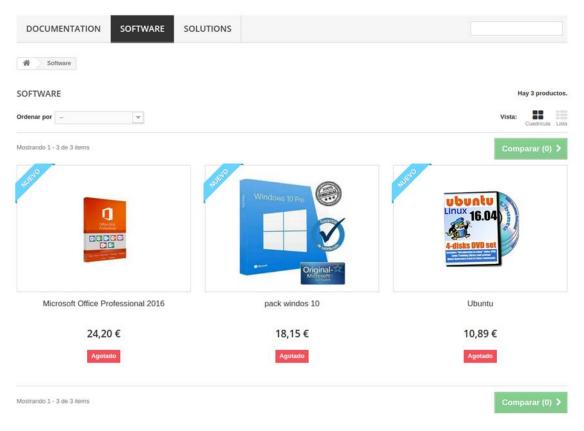

En catálogo > productos le damos a añadir nuevos productos.

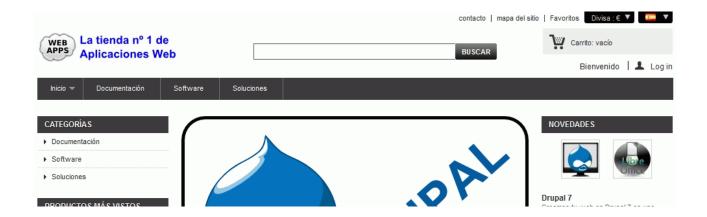

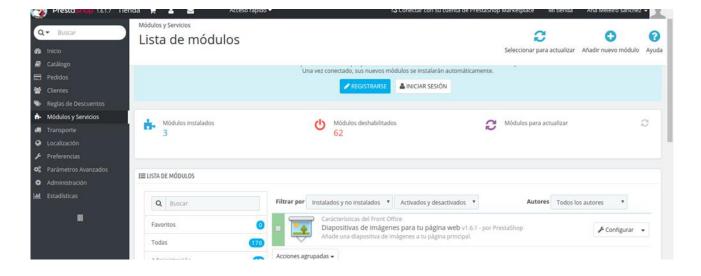

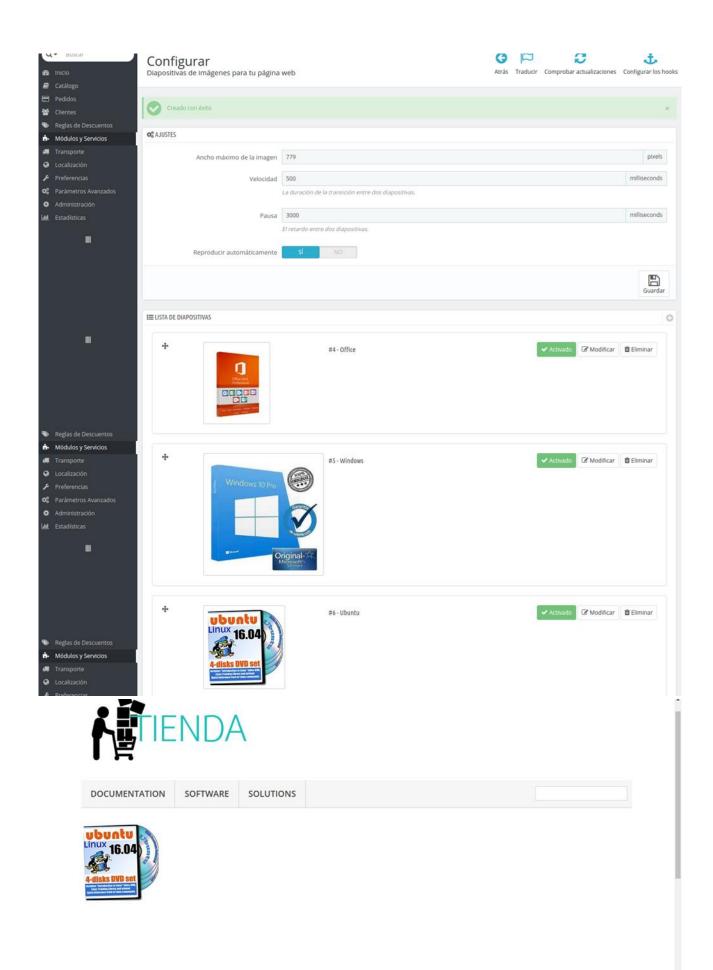

6. Configure and Install (if needed) the Home Slide module to show the new and previously added products. Explain the process and as a not logged user create a full screen snapshopt similar to the following picture.

En modulos y servicios > modulos y servicios Descargamos diapositiva de imagenes para pagina web

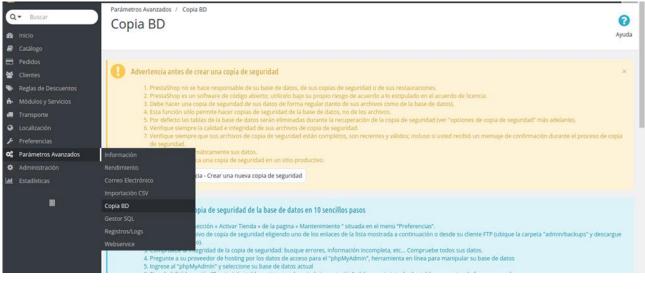

#### Lo configuramos

#### 7.Create a backUp of your app's database. firstname\_lastname\_prestashop.sql

Entrar en parámetros avanzados>copia BD

#### 8. Look for 10 things to secure Prestashop after installation

- 1.-Tener la última versión de prestashop, para actualizaciones de seguridad.
- 2.-Instalar addons de seguridad como Autenticación de Doble Factor para Back Office
- 3.-Utilizar passwords y usuarios fuertes.
- 4.-Usar certificado SSL.
- 5.-Modificar el directorio admin y asegurarlo a traves del .htcaccess. Cambiar el nombre del directorio admin por uno que no incluya esa palabra y no sea fácil de adivinar.
- 6.-Tener cuidado con los permisos que se da.
- 7.-Mantener plugins y addons actualizados.
- 8.-Elegir un buen hosting.
- 9.-Borrar archivos innecesarios.
- 10.-Hacer backups frecuentemente
